**Note  
Projected Due Date:  
Feb 29th**

**Background:** Husband died of Aids 6 months ago leaving Olga pregnant and with 4 other children and no means of financial support.

Olga is a seamstress but no one will give her work out of fear. Her husband's family has ostracized Olga and the children, wanting nothing to do with them. Her Father & Sister however live in Argentina and have invited her into their home. (Before her healing)

Olga plans to go to Argentina once her new baby is 3+ months old and she has raised funds for transportation. Neither her Father or Sister are Christians. She wants to use her testimony to change their lives, and the lives of others, as the Lord has graciously changed hers. Olga has already began to give her testimony in local churches and wants to take the Gospel of the Cross, by way of her healing testimony, to the sick and dying in the Local Aids Hospice.
